Date: Thursday, August 24, 2017 7:21:51 AM

Good morning,

Is TCEQ doing the same thing?

Thanks,

Mark

Subject: RE: New RM Incident - Harvey Tropical Storm - LA Event - LA 2017 Severe Weather

We have confirmed our initial upload of 12 parishes to new Incident *Harvey Tropical Storm*
And we have confirmed the desktop sync of same
We had to re-initialize to see the new incident.

We are adjusting the inventory in the morning
We may elect to add more parishes on Thursday
Thanks, it worked well this round

Subject: New RM Incident - Harvey Tropical Storm - LA Event - LA 2017 Severe Weather

RM Greetings!

We have added a new Incident to our existing event in RM in preparation for Harvey.

Event Name – LA 2017 Severe Weather (pre-existing)
Incident Name – Harvey Tropical Storm (new incident)

We have loaded 12 parishes in southwestern LA with potential to add more on Thursday

We made these updates via the RM Web Interface. Waiting to confirm water system load was successful. Load was confirmed via web interface but not via desktop sync. (yet)

We may be needing assistance on Thursday morning – 8/24/2017 to make sure everything loaded as expected.

Thanks
God Bless Texas and Southwest Louisiana!
